INFRAOPS

Digital infrastructure and operations

Managed digital infrastructure helps organizations establish, coordinate, and maintain the systems they use to communicate, serve customers, and operate their businesses.

CAPABILITIES

01 Managed digital foundation

InfraOps Base starts at $500 per month

- Domain portfolio, DNS, setup, renewals, and asset hygiene
- Business email setup, authentication, user and group administration
- Responsive website, contact forms, analytics, and basic SEO
- Dashboard visibility for requests, deliverables, timelines, and status
- Vendor and license charges billed separately with approval

SUGGESTED NAICS 518210 | 541511 | 541519
SUGGESTED PSC D302 | D307 | D399

Scope note. Monthly credits define included work. Vendor and license charges are separate, and out-of-scope work requires approval before billing.

02 Digital systems, applications, and automation

Scoped by engagement

- Workspace configuration and team onboarding
- Responsive web and mobile application development
- System integrations and workflow automation
- Scoped AI and data workflows with appropriate human review

SUGGESTED NAICS 513210 | 541511 | 541519
SUGGESTED PSC D302 | D307 | D399

Scope note. Scope, access, data handling, and human review responsibilities are agreed before implementation.

03 Digital accounting and financial workflows

Scoped by engagement

- Bank and payment processor intake, with OCR where suitable
- Bank, Stripe, and ledger matching with exception review
- Configured classifications and contract revenue workflows
- Financial statements, period closing, history, and reviewable records

SUGGESTED NAICS 541511 | 541519 | 541611
SUGGESTED PSC B524 | B529 | B544

Scope note. The client and qualified accounting or tax professionals remain responsible for review and compliance conclusions.

WHO WE SUPPORT

Science and technology teams, accounting and law firms, consultancies, construction businesses, contractors, skilled-trade operators, and other small organizations that need dependable infrastructure or operational capacity. InfraOps brings a disciplined approach to business technology by documenting how work happens, measuring what needs improvement, and applying practical tools in scoped steps.

Define your infrastructure scope

Identify your digital assets, users, current systems, and priority workflows to scope implementation or monthly support.
